Assistive Technology Equipment
for 24-hour positioning care & comfort.

ADULTS

Why Choose Astris PME?

As market leaders in Assistive Technology (AT) equipment in Australia, Astris PME provides high quality products that promote independent, active lifestyles. We have a passion for what we do and pride ourselves on delivering expert knowledge of innovative, specialised AT products.

In 2022, Astris PME celebrated 70 years of service to people with a disability! Since our inception in 1952, we have improved the lives of thousands of people by prescribing and supplying exceptional AT equipment from leading manufacturers around the world. Our personalised, expert advice and products are chosen to meet individual needs of clients and change their lives for the better.

The Astris PME Product Range

The Astris PME team continually research new products and global innovation, which is why we can provide the very best assistive technology equipment available in the Australian market today. Before any products are added to the Astris PME range, they are tested and trialled by our panel of equipment users, therapists and product consultants, to make sure they meet all functional and quality requirements, plus regulatory standards for safety.

We are pleased to showcase this dynamic range of quality specialised assistive technology products with you. This brochure features products that have been chosen to indicate the diverse range of products we have available. Most of these products are scripted/prescribed, which means they are customised to suit the specific needs of individual clients.

Product Information, Demonstrations & Trials

Further details, including photos, videos and specifications, can be found by visiting our website and entering the product name in the search field www.astris-pme.com.au.

Clients: To arrange a trial of any of our range, please contact your preferred therapist, and request a joint consultation with an Astris PME Product Consultant. These can be held at our clinic rooms, at your therapist's clinic, or at another suitable location of your choice.

Therapists: To arrange a trial of any of our range, please contact your local branch or our national support hotline.

After Sales Care

An important factor when choosing your AT provider is to consider how well they support you with any after sales care you need. Astris PME has you covered. Depending on your situation, location and level of complexity of your equipment we can provide a range of range of after sales care and support.

We also have mobile workshops that can come to your home, school, hospital, or clinic, and provide on-site repairs, maintenance, and adjustments.

For your peace-of-mind we also offer Programmed Maintenance Plans to many locations. This will help safeguard and extend the life of your equipment, so small issues can be resolved before they cause major issues, and in many cases programmed maintenance can avoid these small issues from even arising.

Scan the QR code or call our Service Department on 02-9135-6440 to learn more about our Programmed Maintenance Plan.

Hire Options For AT Equipment

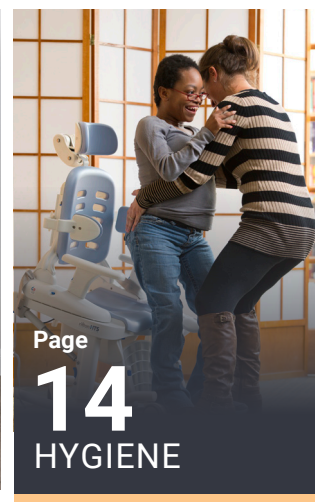

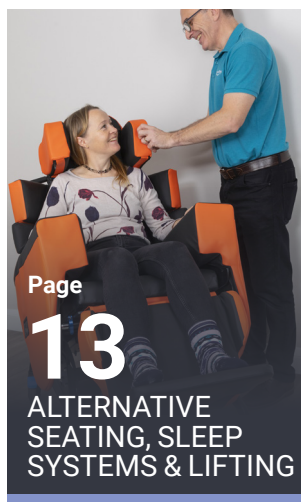

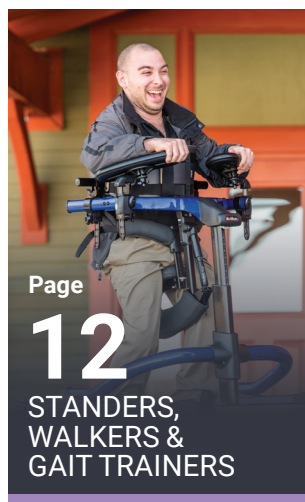

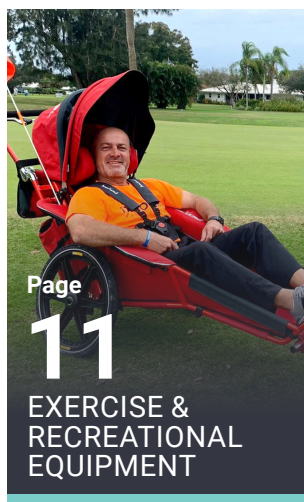

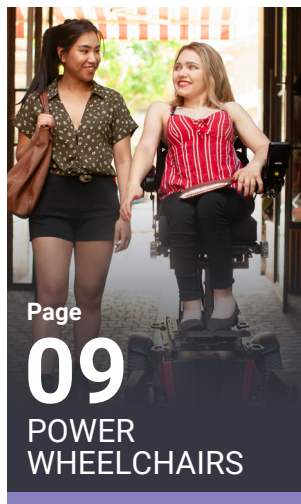

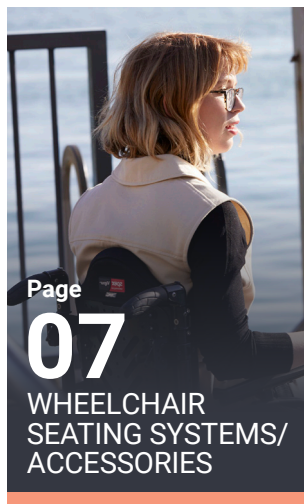

Hire is a great option for short term needs, or where an NDIS Participant is waiting for approved funding. Hire is also beneficial when needs change.

Our Hire service provides you with choice and flexibility when it comes to your care. It can help support you through the times of need as well as let you trial different solutions for your care.

Scan the QR code or call our Hire Department on 02-6380-1001 to learn more about AT Equipment Hire.

Tips On Selecting The Right PWC For You

Power Wheelchairs can open up a world of possibilities for anyone who experiences difficulty with mobilising and seated positioning. However, the effectiveness of the powerchair to achieve your goals is dependent on your choices.

Your unique solution will be influenced by:

- Clinical Factors – Your therapist will identify your needs, both non-negotiable (such as pressure relief, postural control, and drive access) and what can be compromised (additional features such as standing function, multiple transport options, or all-terrain access).
- Lifestyle Factors – What does every day look like and where do you need to go?
- Personal Choice – what is a “need to have” Vs “nice to have”?

1

The Seating: With your therapist, decide what level of seating support is required to meet your postural and pressure needs.

2

Power Seating Functions: The options are tilt, recline, seat elevate, foot elevate, and standing, with combinations selected based on your therapists’ assessment of your needs.

3

Access: Be clear about how you are going to control the chair as this influences your choice of power base.

4

The Power Base and Drive wheel position: All power wheelchair bases have their pros and cons, and you will also need to consider the motor capabilities of each model to make the best choice. It comes down to, “What do you need the chair to do? What goals are you trying to achieve?”. Remembering that a compromise is likely to be needed, so understanding what is most important to you should remain front of mind. The options include Rear Wheel Drive, Front Wheel Drive, Mid Wheel Drive and All Terrain.

5

Suspension: How the suspension of the chair is achieved on the base, and how it interacts with your choice of seating, is different for every chair. Check the ride quality over the surfaces you are going to be accessing. The choice of tyre will also determine how the chair handles and where it can go.

6

Set Up: Now that you’ve made all the choices on the script for a powerchair and seating it should all just come together, right? In fact, this is where the skills of an experienced therapist and your AT specialist really come to the fore.

Power Assist - Helping You Make The Choice

Enhancing your lifestyle each day at work, home and everywhere in between would be a little easier if your manual wheelchair could have the occasional power boost. Now you can, with the addition of a power assist device to your existing or new fixed or folding frame wheelchair. Experience the benefits of reducing your energy expenditure and overall frequency of upper limb movements during manual propulsion.

At Astris PME, we enjoy improving lives by providing a broad range of power assist options for you to choose from. With many options available though, how do you choose the best option for you? By collaborating with you, your therapist, and our seasoned product specialists, we can form a great team to come up with the most suitable solution for your specific requirements. Some factors that need to be considered prior to settling on your preferred power assist unit:

- Your needs and physical capacity.
- Environments you would like to access.
- Activities you typically participate in.
- Other resources available to you; for example, assistance in transferring the wheelchair and power assist to and from a vehicle.

Managing a power assist option on your wheelchair also requires skills relating to memory, perceptual abilities and cognitive skills. Goals for providing a device can be diverse and highly individual so it would be beneficial to have a discussion with your therapist about whether a power assist option would be suitable, and to help guide the process of trialling the appropriate option.

Klaxon Twist

View our range

There are numerous benefits to using power assist devices, including:

- Reducing stress and strain on the upper limbs – shoulders and wrists.
- Reducing demands on the heart and respiratory functions.
- Making participation and access easier every day.
- Permitting access to challenging environments.
- Facilitating improved capacity to manage your workday to remain employed.
- Enabling storage into a standard car boot without the need to invest in the purchase of larger vehicles and additional costs associated with vehicle modifications.
- Reducing the need for home modifications to accommodate larger power chairs.

Make an appointment with one of our Specialist Consultants to find out which power assist option is right for you.

What is the Astris PME Difference?

The team at Astris PME have an ongoing commitment to providing the highest level of service to therapists, equipment users and their families.

We do this through our 'Ecosystem'. We have a dynamic and accomplished team of people working across different departments, interacting with each other to create and exchange sustainable value.

This is the Astris PME Ecosystem, and it is our key difference. We work together to ensure that we can provide the very best support for our all our clients - including Equipment Users, Carers and Therapists.

Make an appointment to visit one of Astris PME's interactive showrooms and view our vast range of AT equipment.
