Why Choose Astris PME?

As market leaders in Assistive Technology (AT) equipment in Australia, Astris PME provides high quality products that promote independent, active lifestyles. We have a passion for what we do and pride ourselves on delivering expert knowledge of innovative, specialised AT products.

In 2022, Astris PME celebrated 70 years of service to people with a disability! Since our inception in 1952, we have improved the lives of thousands of people by prescribing and supplying exceptional AT equipment from leading manufacturers around the world. Our personalised, expert advice and products are chosen to meet individual needs of clients and change their lives for the better.

Astris PME 'Experience Centres'

Our growth has seen many exciting changes including the opening of new facilities in Sydney, Melbourne, Brisbane, ACT and regional areas. Astris PME 'Experience Centres' (showrooms) are world class in design and provide a unique experience to view over 300 different items of AT equipment.

The Astris PME Product Range

The Astris PME team continually research new products and global innovation, which is why we can provide the very best assistive technology equipment available in the Australian market today. Before any products are added to the Astris PME range, they are tested and trialled by our panel of equipment users, therapists and product consultants, to make sure they meet all functional and quality requirements, plus regulatory standards for safety.

We are pleased to showcase this dynamic range of quality specialised assistive technology products with you. This brochure features products that have been chosen to indicate the diverse range of products we have available. Most of these products are scripted/prescribed, which means they are customised to suit the specific needs of individual clients. That means they are customised to suit the specific needs of each individual client.

Product Information, Demonstrations & Trials

Further details, including photos, videos and specifications, can be found by visiting our website and entering the product name in the search field www.astris-pme.com.au.

Clients: To arrange a trial of any of our range, please contact your preferred therapist, and request a joint consultation with an Astris PME Product Consultant. These can be held at our clinic rooms, at your therapist's clinic, or at another suitable location of your choice.

Therapists: To arrange a trial of any of our range, please contact your local branch or our national support hotline.

7 Tips On Selecting The Right PWC For You

Your Power Wheelchair (PWC) is probably the most expensive item of Assistive Technology you own, apart from your vehicle. For the average PWC user, the typical equipment lifespan is around 4-5 years, so it is critical that users make the right decision when selecting their equipment.

As a leading provider of PWC and other specialised equipment for clients with special needs, Astris PME is well placed to share some advice based on our experience. This simple guide has been put together by leading Equipment Consultants, with input from many PWC users across a wide range of conditions (clinical and physical needs), ages and geographic locations.

Before deciding on what model Powered Wheelchair to apply for funding for, we have put together a short checklist of 7 things we recommend you check.

- 1 Get good advice.** Ask your therapist what equipment they recommend, based on their knowledge of your clinical needs and goals, and other factors. Connect with an experienced Assistive Technology Professional (ATP), and get their recommendations and advice. Trial before you buy!
- 2 Consider your environment.** Your PWC needs to perform in the environments where you work and play. You want your chair to be robust enough to take you where your manual chair can't, but still be refined enough to look the part in indoor areas and amongst company.
- 3 Consider your clinical needs.** Work with your therapist to ensure that the equipment will suit your needs, both now and in the future. If your needs are changing, you may consider hire option. Although this costs more than an outright purchase, it may suit you better if your needs are changing.
- 4 Consider your goals.** Consider your education, employment and inclusion goals, and ensure that this investment will put you on track to achieve these goals.
- 5 Consider your seating system.** Make sure your therapist and ATP are making decisions as to your comfort and support, not just on the powered base.
- 6 Consider post sale support.** A PWC has many moving parts, and things will go wrong. Ask about the warranty, about programmed maintenance packages, and about how your supplier looks after after-sale support (including breakdowns). This is extremely important if you work away from home, or live in a remote area.
- 7 Consider a MWC with Power Add-On.** Lastly, before you jump in and purchase a PWC, consider if a manual chair with a removable power assist or power-add on would better suit your needs. Discuss this option with your therapist and ATP.

Power Assist - Helping You Make The Choice

Enhance your lifestyle with a power assist device by adding it to your existing or new fixed or folding frame wheelchair. It reduces the energy expenditure required for effortful propulsion and reduces the overall frequency of upper limb movements during distance mobility.

At Astris PME, we continue to improve lives by availing a broad range of power assist options to be able live your preferred lifestyle. Understanding your preferences will assist in deciding on the most suitable options to explore further. Some factors that need to be considered prior to settling on your preferred power assist unit:

- Your needs and physical capacity.
- Environments you would like to access.
- Activities you typically participate in.
- Other resources available to you; for example, assistance in transferring the wheelchair and power assist to and from a vehicle.

Managing a power assist option on your wheelchair also requires skills relating to memory, perceptual abilities and cognitive skills. Goals for providing a device can be diverse and highly individual. It may be beneficial to have a discussion with your Occupational Therapist about whether

a power assist option would be suitable, and the process of trialling the appropriate option.

There are numerous benefits to using power assist devices, including:

- Reducing stress and strain on the upper limbs – shoulders and wrists.
- Reducing demands on the heart and respiratory functions.
- Increasing efficiency in daily activity participation and social access.
- Permitting access to challenging environments.
- Facilitating improved capacity to manage your work day to remain employed.
- Enabling storage into a standard car boot without the need to invest in purchase of larger vehicles and additional costs associated with vehicle modifications.
- Eliminating the need for home modifications to accommodate larger power chairs.

Make an appointment with one of our Specialist Consultants to find out which power assist option is right for you.

Introducing the Klaxon Twist

- Multi-configuration allowing you to connect via the front or rear
- Lightweight and manoeuvrable to accompany you on every journey

After Sales Care

An important factor when choosing your AT provider is to consider how well they support you with any after sales care you need. Astris PME has you covered. Depending on your situation, location and level of complexity of your equipment we can provide a range of range of after sales care and support.

We also have mobile workshops that can come to your home, school, hospital, or clinic, and provide on-site repairs, maintenance, and adjustments.

For your peace-of-mind we also offer Programmed Maintenance Plans to many locations. This will help safeguard and extend the life of your equipment, so small issues can be resolved before they cause major issues, and in many cases programmed maintenance can avoid these small issues from even arising.

Scan the QR code or call our Service Department on 02-9135-6440 to learn more about our Programmed Maintenance Plan.

Hire Options For AT Equipment

Hire is a great option for short term needs, or where an NDIS Participant is waiting for approved funding. Hire is also beneficial when needs change.

Our Hire service provides you with choice and flexibility when it comes to your care. It can help support you through the times of need as well as let you trial different solutions for your care.

Scan the QR code or call your local branch or our national support hotline to learn more about AT Equipment Hire.

**Minimum hire period applies*
